Duke Lemur Center Personnel: Dr. Anne D. Yoder, Director,
Ms. Andrea Katz, Live Animal Curator, Mr. Greg Dye, Operations Manager

Dear

The faces on this page fill us with joy. They are all infants born at Duke Lemur Center this year. New life fills us with hope. Especially when every face you see is one more animal for an endangered species – every animal is one more strand in the vital genetic safety net the Lemur Center provides.

The people at Duke Lemur Center lie awake at night. These faces, these species could disappear from the face of the Earth. We don't want that to happen. Life is precious. All life. But these faces are more than endearing, more than adorable. Every atom of these animals is imprinted with science found nowhere else. They hold biological history. We wonder what pieces of our future they might hold.

We can help. That gets us out of bed in the morning. We can care for these animals. We can study them. We can work with the people of Madagascar and with fellow scientists from many disciplines and many institutions to save the lemurs, save the land, empower the people, and enrich our knowledge base, so that the lemurs on this page have a certain future. So these infants can grow and mature and birth future generations into a world where the environment is safe and lemurs are secure.

Amount	Helps provide
\$ 50	75 pounds of primate chow
\$ 100	Training and enrichment materials
\$ 250	Health and medical supplies
\$ 500	Heating/cooling to keep the animals comfortable
\$1,000	Safe animal enclosures

It starts today. It starts with caring for these infants, making certain they survive and grow healthy and strong. You can help.

Sincerely,

Lari Powell Hatley
Development Officer
